

# Interesting in driving construction machinery ? Woodworking and landscape work ?

## Training Places for Young People in Howe of Fife and surrounding villages

NHTT has been successful in being awarded funding – to provide training for local young people, transform local footpaths and create bike parking places.

This training is really valuable, for example the Dumper training costs well over £300 per person. The deal is that you do the training as part to 5 weeks work experience. That way you get the training for free and the communities of Letham, Collessie and Giffordtown get paths & bike parking. It's a pretty good deal all round! If you are unemployed, it will not affect your claim.

The training and work experience are **starting 1st October 2011** – so if you're interested please contact Crispin Hayes on **0845 458 8335** who is managing the project for NHTT. Also contact us if you fancy being part of woodworking opportunities that are coming up.

would like to thank the project funders:
